

ABOUT US

digit@lab is an "intellectual – brain power – innovation provider" to financial organizations

We produce game changing and disruptive digital solutions, as well as "game friendly" and "reconstructive" customer centric propositions that are fast and effective – saving costs, improving quality and customer satisfaction, plus opening new markets.

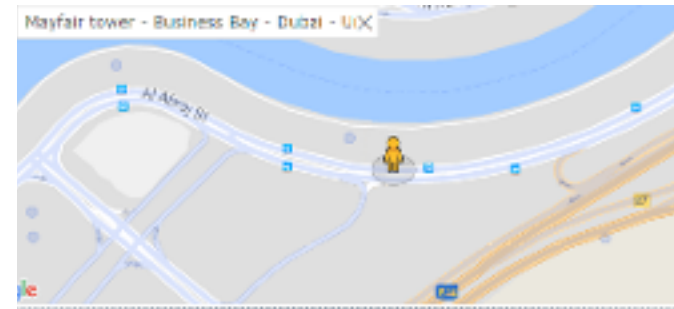

digit@lab has been established to precisely offer the digital services and solutions to financial organizations that need to transform and be able to surf new swells.

digit@lab focus on blending new digital technologies with old financial products & processes, offer customizable/ white labeled InsurTech and FinTech solutions.

digit@lab help bridge some disconnect between CXOs/ Boards & the new Social, Market and Technological realities regarding the IoT

Fire and Property Policy & Claims Administration integrated with Risk Survey and Accumulation

A complete end-to-end platform that help improve operational efficiency and give Underwriters a tool for easy and quick decisions making capabilities and price more accurately before accepting any risk.
